STATE STIMULATION OF THE DEVELOPMENT OF INNOVATIVE PROCESSES IN THE ECONOMY

Abstract. *The processes of globalization taking place in the XXI century reinforce the trends of transformation of the post-industrial state into a qualitatively new stage of innovative development of the national economy. In this regard, the importance of innovation potential as a strategic resource and an alternative source of economic development, based on the transition to an innovative type of reproduction, is increasing. The article examines a number of features of the government policy of stimulating the development of the innovation sphere in the Republic of Uzbekistan, identifies some factors that restrain its activation. Based on the study of world experience, a number of measures have been developed to enhance the support of innovative processes.*

Keywords: *innovation, innovative development, state regulation, competition, world economy.*

ГОСУДАРСТВЕННОЕ СТИМУЛИРОВАНИЕ РАЗВИТИЯ ИННОВАЦИОННЫХ ПРОЦЕССОВ В ЭКОНОМИКЕ

Аннотация. Процессы глобализации, происходящие в XXI веке, усиливают тенденции трансформации постиндустриального состояния в качественно новый этап инновационного развития национальной экономики. В связи с этим возрастает значение инновационного потенциала как ресурса стратегического характера и безальтернативного источника экономического развития, на основе перехода к инновационному типу воспроизводства. В статье изучены ряд особенностей правительственной политики стимулирования развития инновационной сферы в Республике Узбекистан, выявляются некоторые факторы, которые сдерживают ее активизацию. На основе изучения мирового опыта разработан ряд мероприятий по активизации поддержки инновационных процессов.

Ключевые слова: инновация, инновационное развитие, государственное регулирование, конкуренция, мировая экономика.

Introduction

Relevance of the research topic. At the turn of the millennium, the paradigm of economic development changed, and the previously dominant financial component in its "engine" gave way to the knowledge component.

The successes of economic entities, corporate entities, regions and entire states are increasingly associated with new knowledge, new technologies and a new organization of production activities. Once implemented, these innovations become innovations that shape the face of the modern economy. In the conditions of a rapid increase in the level of informatization of society, the rapid development of the international division of labor, the aggravation of uncertainty in domestic and foreign markets to ensure competitiveness, economic security of the national economy and individual economic entities, it is necessary to intensify innovative development. The high cost and risk of implementing

innovative projects, their intellectual potential are key factors, which influence the decisions of the heads of economic entities regarding the implementation of innovative activities. Insufficient experience in innovation management at the level of economic entities and insufficient development of market infrastructure are the most significant problems on the path of innovative development.

In order to properly support the innovation process within any economic system – an enterprise, corporation, region or state – an appropriate infrastructure is being formed designed to deliver production of new knowledge "on stream". It is formed by interrelated institutional elements – scientific, financial, innovation, logistics and others – that ultimately form an innovative environment that is in every way conducive to innovative development. At the state level, such an environment is called the National Innovation System (NIS). Due to its consistency, the latter should be holistic and goal-oriented, as well as have the properties of self-organization, self-improvement and self-development.

Unfortunately, we have to state that NIS Uzbekistan does not yet have such properties in full. Therefore, there is an urgent need to study its current state, identify and configure intra-system problems, identify factors that hinder the innovative development of the domestic economy and develop proposals to neutralize them. A particularly urgent need to address these issues is observed in the regional context. The issues of implementation of open models of innovation process are becoming increasingly important in light of the discussion about the globalization of research and development (R&D), specialization subjects of innovative activity, increase of capital mobility, widespread dissemination of information and communication technologies, organization of innovative network space. The implementation of an innovative idea requires unique resources, for lack or limitation of which the subjects of innovative activity are forced to turn to the external environment. As a result, openness becomes a way to increase the innovative potential of systems at all levels of the economy.

Literature analysis

The degree of development of the problem. Domestic scientists Ikramov M.A., Gulamov S.S., Gafurov U.N., Kodyrov A.M., Kurpayanidi K.I. and others were engaged in research in the field of development of the theory of innovation, creation and functioning of innovation infrastructure, etc.

Among foreign scientists, R. Ayres, P. Andriani, R. Atkinson, R. Vetvey, K. Lobas, S. Kasner, F. Knight, I. Nonaka, K. Pavitt, P. Patel, M. Porter, M. Russell, K. Sierra, H. Takeuchi, S. Testa, A. Portes contributed to the development of the theory of innovation and innovative activity. K. Freeman, R. Hall, M. Hammer, et al.

At the same time, the multifaceted nature of the problem of state support for innovation activities associated with ensuring its sustainable development, its insufficient scientific elaboration taking into account the realities of the modern economy, necessitated the implementation of further theoretical and practical developments in this area.

Theoretical and methodological basis.

The basis of the research is the conceptual provisions contained in the research of Uzbek and foreign scientists in the field of innovative development of the national

economy, innovation, methods and tools for evaluating the results of innovation, tax management, taxation

Discussions

At present, the Republic of Uzbekistan is undergoing deep structural transformations and implementing important strategic tasks. In Uzbekistan, innovative activities aimed at producing competitive products and expanding exports are supported by the state. This is done through the legal and regulatory system, state and departmental funds, major projects and investment programs, taxation, and other mechanisms. In the economy of Uzbekistan, taxes are the main source of state budget funds, as well as an effective tool for influencing investment and innovation activities. Currently, in accordance with the Tax code (article 17), there are 9 types of taxes and 3 special tax regimes in the national economy.

Analysis of the existing practice of taxation of legal entities and individuals in the Republic of Uzbekistan shows that there are currently significant reserves for strengthening tax incentives in the innovation sector of the economy. The most difficult problem is that in the economy there is a "gap between the completed scientific part of R & d and the requirements of industrial production for the development of innovations." This factor, which hinders the innovative development of the country, still remains relevant. In this regard, in the short term, in the context of increasing competition on domestic and global markets, and increasing the impact of external risks, it is necessary to expand the range of tax incentives for innovation.

In order to create an enabling environment for increased innovation, some economists suggest implementing the following measures:

- lower tax rates on profits used to Finance R & d, purchase of high-tech equipment, and other purposes related to innovation;
- consider reducing the tax base by the amount of R & d expenditures;
- develop a procedure for granting tax credit for tax payments from profits used for innovative purposes;
- include R & d costs in the cost of production;
- provide for tax holidays on the profit received from the implementation of innovative projects, provided for several years;
- establish tax incentives for profits derived from the use of patented inventions, know-how and other intellectual property;
- reduce taxable profit on the amount of contributions to funds used for innovation activities, for the purchase of devices and equipment transferred to the research and innovation areas.

It is necessary to return to the practice when the income of individuals from the sale of a patent (license), received dividends or interest from the availability of rights to innovations within the term of their validity is not taxed on income from individuals. It is necessary to speed up the development of regulatory documents that provide significant benefits for innovators, inventors, and innovators, as well as ensuring parallel funding for research by both scientific institutions and centers, as well as industrial enterprises. This will significantly increase the financial interest of innovators (scientists, employees of

enterprises and other organizations), as well as legal entities in activating the innovation process.

In order to stimulate innovation for legal entities, it is advisable to use tax incentives not only for profit tax, but also for such tax payments as a single tax payment for small businesses and microfirms, a tax on improvement and development of social infrastructure, a single land tax for agricultural producers (if they are engaged in the creation, promotion, commercialization and use of innovations). The development of small businesses and micro-firms has been given great importance in recent years. However, tax incentives are clearly not enough for small businesses engaged in innovation.

In terms of tax benefits on profits should establish a rule by which the expenses of business entities in the development of new productions, workshops, production of new types of serial and mass production and technological processes, comprehensive testing of all types of equipment and technological installations for the purpose of checking quality and their installation should be subtracted from the taxable base of the profit tax not only in future periods, but at the time of their occurrence during the reporting period.

In addition, it is advisable to introduce differentiated rates of value-added tax on exported products. Currently, a single VAT rate of 0% is set for exported products. This means that regardless of the type of product, VAT is not charged on its export, and the "input" VAT is returned from the state Budget, which exporters pay to their suppliers (raw materials, fuel, components, services of third-party organizations). As a result, exporters of raw materials and high-value-added products have the same incentives to pay VAT. You should only provide a 0% rate for products with a high added value or degree of processing. For exporters of raw materials and energy resources, a VAT rate of 5 to 10% should be introduced, depending on the cost of production and world prices. This will encourage the expansion of exports of high-tech products and, consequently, innovative products.

When you import it is also possible to introduce differentiated VAT rates. For example, when importing consumer goods, the VAT rate can be kept at the same level (15 %), and when importing modern technological equipment, raw materials and energy carriers, it can be reduced to the level of 10-15 %. The above measures will encourage the import of modern equipment, as well as raw materials and energy resources (which are not produced in Uzbekistan).

Conclusion

Thus, on the basis of improving taxation mechanisms and introducing other incentives in the national economy, it is advisable to create conditions favorable for increasing the level of competitiveness of products with a high degree of processing and added value, and expanding its exports. In the coming years, the national economy needs to improve the effectiveness of existing tax incentives to activate foreign economic activity on the basis of innovative development. Under these conditions, the economy will be least affected by both external and internal risks, which will ensure its sustainable development in the long term. The above-mentioned measures will strengthen the economic incentives aimed at enhancing scientific and innovative activities, which will

serve as a prerequisite for improving the competitiveness of the national economy and achieving the set priorities in the medium and long term.

Uzbekistan's gradual transition to an innovative path of development, the formation of an economic mechanism in the country in which useful technologies and goods will quickly enter the domestic and foreign markets, will ensure its worthy place in the global economy.

ЭЪЛОН

Хурматли ҳамкасабалар “Al-Ferganus” нашриёти ва “Xalqaro nazariy va amaliy tadqiqotlar jurnali” электрон журнали Ўзбекистон таълим хизматлари бозорида ўзининг фаолиятини бошлаганлигини маълум қиласиз.

Ажойиб имкониятдан сиз биринчилар қаторида фойдаланиб илмий нашрларингизни чоп этишингиз мумкин.

“Al-Ferganus” нашриётимиз томонидан Сиз тақдим этган дарслик, ўқув қўлланма, монография ва илмий рисолаларга ISBN, DOI ҳалқаро рақамли иденфикаторларни бириктириш, уларнинг электрон замонавий андозадаги муқовалар ва ишланмаларнинг электрон макетини яратиш, нашриётда эълон қилинган ишларни электрон ахборот нашрларида жойлаштириш хизматлари кўрсатилади.

Бизнинг нашриётимизнинг бошқа нашриётлардан фарқи шундаки, тезкор ва сифатли хизмат кўрсатамиз ҳамда энг асосийси биз Сизнинг ишларингизни Алишер Навоий номидаги Ўзбекистон Миллий кутубхонаси ва Россия Миллий кутубхонаси фондларига бепул жойлашга шунингдек, Россия илмий иқтибослик индекси (РИНЦ ва E – library) платформасига, CrossRef базаларига шартнома асосида жойлаштиришга қўмаклашамиз.

“Xalqaro nazariy va amaliy tadqiqotlar jurnali” ISSN 2181-2357 электрон журнали ҳам ўз фаолиятини бошламоқда. Бизнинг журналда Ўзбекистон Республикаси Олий аттестация комиссиясининг қуйидаги ихтисосликлари физика-математика, кимё, биология, геология-минералогия, техника, қишлоқ хўжалиги,

тариҳ, иқтисодиёт, фалсафа, филология, география, юридик, педагогика, тиббиёт санъатшунослик, архитектура, психология, социология фанлари бўйича миллий ва хорижий муаллифларнинг фанлардан эришган ютуқлари ва истиқболлари борасидаги илмий мақолалари, илмий тадқиқотлар олиб бораётган олимларнинг илмий изланишлари натижалари эълон қилинади. Электрон журнал ҳар ойда бир марта эълон қилинади.

Журналларда эълон қилинадиган ҳар бир мақолага шартнома асосида DOI (Crossref) рақами берилади.

Шунингдек, таҳририят томонидан:

- мақолаларни сифатли таржима қилиш;
- мақолаларни таҳрирлаш ва журналлар талабига мослаш;
- мақолаларга ишлов бериш;
- мақолаларни плагиатга текшириш;
- хориждаги нуфузли (Scopus, Web of sciences ва юқори импакт факторли) журналларда мақолларни сифатли ва ишончли чоп этишга қўмаклашиш хизматларини ҳам кўрсатади.

Имкониятни бой бериб қўйманг!

ВНИМАНИЕ ОБЪЯВЛЕНИЕ!

Уважаемые коллеги! Сообщаем вам, что издательский дом «AL-FARGANUS» и «Xalqaro nazariy va amaliy tadqiqotlar jurnali» - «Международный журнал теоретических и прикладных исследований» начали свою деятельность на рынке образовательных услуг Узбекистана.

Это прекрасная возможность одним из первых опубликовать свои научные публикации. Наше издательство «AL-FARGANUS» предоставляет услуги по прикреплению международных цифровых идентификаторов ISBN, DOI к учебникам, учебным пособиям, монографиям и научным брошюрам, созданию электронных макетов их обложек и дизайнов в современной электронной форме, размещению опубликованных работ в электронные публикации.

Отличие нашего издательства от других издательств в том, что мы предоставляем быстрые и качественные услуги, а главное, бесплатно размещаем ваши работы в Национальной библиотеке Узбекистана им. Алишера Навои и оказываем помошь в размещении вашей работы в Российской национальной библиотеке, а также на платформе Российского индекса научного цитирования (РИНЦ, e-library) облегчить размещение.

Совместно с Ферганским политехническим институтом запущен проект электронного научного журнала «Xalqaro nazariy va amaliy tadqiqotlar jurnali – International Journal of Theoretical and Practical Research. Международный журнал теоретических и прикладных исследований».

Миссия научного электронного журнала направлена на развитие национальной и зарубежной науки, обеспечение общедоступности теоретических

позиций и практических результатов прикладных исследований. В журнале представлены следующие специальности Высшей аттестационной комиссии Республики Узбекистан по физике и математике, химии, биологии, геологии и минералогии, технике, сельскому хозяйству, истории, экономике, философии, филологии, географии, праву, педагогике, медицине, архитектуре, психологии, социологии. Журнал публикует научные статьи отечественных и зарубежных авторов о достижениях и перспективах науки, результатах научных исследований ученых, проводящих исследования. Электронный журнал издается один раз в месяц.

Каждой статье, опубликованной в журнале, на контрактной основе присваивается номер DOI (Crossref).

Также издательство оказывает услуги по:

- качественный перевод статей;
- редактирование статей и адаптация к требованиям журнала;
- обработка статей;
- проверка научных работ (статей, учебных пособий, монографий, диссертаций и др.) на плагиат статей;
- оказывает информационное обеспечение публикаций статей в престижных зарубежных журналах (Scopus, Web of Sciences и журналах с высоким импакт-фактором).

Не упускайте возможность!

Пожалуйста, свяжитесь с нами:
